

Steel Fixing & Reinforcement Services

At MSB Civil Contracting Pty Ltd, we provide steel fixing and reinforcement services for residential, commercial and civil construction projects. With over 13 years of hands-on industry experience, we understand the importance of accurate reinforcement placement, quality workmanship and attention to detail on every job.

From residential footings and concrete pads through to larger commercial slabs and civil construction projects, we take pride in delivering reliable service and quality results.

Our Steel Fixing Services

Footings & Foundations — Steel reinforcement installation for footings, foundations and concrete pads.

Reinforcement Mesh — Placement and installation of reinforcing mesh for concrete slabs and other suitable applications.

Concrete Slabs — Steel fixing for slabs on ground and suspended slabs, where applicable.

Reinforcing Bar Installation — Installation and tying of reinforcing steel in accordance with project drawings and specifications.

Beam & Structural Reinforcement — Steel fixing for beams and other reinforced concrete elements.

Residential Steel Fixing — Reinforcement for domestic concrete projects, including slabs, footings and extensions.

Commercial & Civil Steel Fixing — Reinforcement works for suitable commercial developments and civil construction projects.

Quality Workmanship You Can Rely On

At MSB Civil, we understand that steel reinforcement plays a critical role in the strength and performance of reinforced concrete structures.

We focus on accurate placement, secure tying and following the relevant engineering drawings and project specifications. We work towards maintaining a professional standard throughout every stage of the job, helping ensure reinforcement is ready for inspection and concrete placement.

Whether you're a builder, developer or contractor, we aim to provide dependable service and workmanship you can have confidence in.
